Feedback Process

The IQAC cell of the college collected students' feedback on various aspects of the teaching-learning process. In the current session of 2020-21, the offline feedback system was adopted for collecting the feedback of the students. The purpose of the feedback is to make the institution more accountable, efficient and transparent. The result of the feedback is expected to help in the SWOC analysis of the institution. The process starts with the distribution and collection of the feedbacks form from the students, thereafter, all the data are compiled and analyzed by using the appropriate statistical method. The students' feedback is collected on the following parameters: i. Cooperation of the teachers ii. Facilities in the library iii. Reading room for the students' iv. Study materials are available in the library. Toilet facilities available in the campus vi. Maintenance of the classroom infrastructures. vii. The ambience of the campus. Viii. Redressed the students' grievances. Ix.The knowledge base of the teachers. X. Effort taken for improving the teaching-learning. Xi. Overall teaching and mentoring process and so on. Based on the respondent's data the IQAC carefully analyzed it. After the analysis of the feedback result, the Principal and IQAC Coordinator convey it to each faculty member to solve issues.

Feedback Analysis:

From the analysis of the data on each of the parameters, it has observed mixed responses from the students. According to the finding from the data, it has been found that some of the parameters are showing a positive trend while some of them need to be improved. It has been observed in parameters 1 to 4, 6 to 10, 12 (a), (c), (d), (e), (f) and (g) that most of the students are satisfied with the services provided to them. However, parameter no.5 about the washrooms available and maintenances, 64 of them responded as strongly disagree and 47 of them disagree while 12 students have responded neutrally fig 5. Again in fig 11, the monitoring process of the college needs to improve as the maximum of the students responded disagree and strongly disagree and also in 14 (b) of the query i.e about the computer facility provided to them, 38 of the students responded as strongly disagree and 29 of them responded as disagree. Therefore these 3 parameters, as per the finding, action has to be taken to improve the overall academic environment of the campus
